## Storage and handling Recommendations

LUCENE™ LC170 is available in free-flowing pelletized form designed for use in conventional polymer fabrication systems. The proper storage and handling of these product is extremely important for the products to remain flowable for transport and processing without pellet blocking.

- **To prevent pellet blocking**
  - To minimize static load, do not double stack pallets.
  - Keeping storage and handling temperature between 10 ~ 25°C.
  - Store the resins in the warehouse to protect from exposure to elevated temperature which is not to exceed 35°C.
  - Consume the resins on a first in, first out basis.
